

USD stablecoin supply rose \$406m between 4 and 5 October, to \$313.37bn.

USD stablecoin supply

\$313.37bn

Onchain Dollar Share

1.3425%

\$1 for every \$74 of US M2

Market change

+\$405.87m

vs 4 October 2026

WHAT IT MEANS

That is 1.3425% of US M2, the broad measure of US dollars in the economy: roughly \$1 of stablecoins for every \$74 of US M2. We couldn't make a reliable Signal assessment for 5 October because the evidence on individual stablecoins wasn't strong enough. That is not a finding that no Signal applied. Stable Tape did not publish a day-over-day breakdown by stablecoin, chain or issuer with this record, so it can't show what drove the change. The comparison uses US M2 of \$23,342,800,000,000, as of 1 August 2026 (source: FRED M2SL). Current levels by stablecoin, chain and issuer were published for this fixing. Any Structure Move, the day-over-day comparison, is shown at stabletape.com/tape/2026-10-05.
